If you cannot recall the password or the Google account synced with your device, the lock will keep you from accessing your device. With the right tool, you can easily get rid of the FRP lock or the screen password. In this article, we will show you the best device unlock APK you can use. If you would like to use a tool that offers a high success rate, you should invest in LockWiper (Android) FRP unlock tool. This tool works with all Android versions, including Android 9.0, which is the latest. After using LockWiper to bypass the FRP lock, you will have the ability to use a different Google account. Since LockWiper helps you get rid of the old Google account, it ensures that you do not get monitored or blocked remotely from using the Android device via the previous owner's account. LockWiper has been tested on 6000+ device models running on Android. On all the devices, the tool was able to bypass the FRP Lock. 7,500,000+ Downloads LockWiper (Android) Key Features You won't need to know the password or Google account on the device to bypass FRP. LockWiper grants you full access to all the features on the Android device. After getting your device access back, you will never be going to be tracked or limited by your previous account. After removing the previous account from the device, you eliminate the chances of being blocked or tracked remotely. LockWiper has a user-friendly interface. You don't need any tech skills to use it. Try It Free How to Bypass the FRP Lock Using LockWiper: Step 1: Download and launch LockWiper and select "Remove Google Lock (FRP)". Step 2: Connect the Android device to the PC using a USB cable. Step 3: Follow the onscreen instructions to download the device's data package > tap Start to Extract > put the device in the Downloading Mode > click Next > enter 000000 to initiate the installation process. Step 4: After enabling the OEM unlock and USB debugging, follow the onscreen instructions to download and extract the device's firmware. Step 5: Wait while LockWiper bypasses the FRP lock. Got Questions About Device Unlock APK - LockWiper (Android)? 1. How can I know whether LockWiper works on my device? LockWiper does have a free trial version. If you would like to confirm whether the tool can work on your device, simply install the trial version and use it to test LockWiper. 2. Does it completely unlock FRP lock and get rid of the previous account? After using LockWiper to get rid of the FRP lock, the lock will be gone forever. The tool will remove the previous Google account too. 3. Can I use a new Google account on the device? When using LockWiper to bypass the FRP lock, you will get rid of the old Google account, as mentioned earlier. With no synced Google account, the Android device will allow you to sync it with a new Google account. To avoid having issues with the FRP lock in the future, you should use an account whose password you can recall easily. 4. Will the application reset my Samsung after bypassing the FRP? Since the FRP lock appears when you are trying to reset your Samsung device, LockWiper helps you complete the reset process. This means that after you use it, your device will be factory reset. All your data will be erased. If you would like to eliminate the chances of losing important data, backing up the data is important. Final Words: If the FRP lock is keeping you from resetting your Android device, you can opt to use a Device Unlock APK to help you with bypassing the lock. To increase the chances of unlocking the FRP lock, LockWiper (Android) is highly recommended for you. If you are not sure whether LockWiper can work for you, you can test it for free using the trial version. Try It Free "I have deleted some videos 2-3 months back and had deleted them from a recently deleted folder but now I wanna restore them. Is there any way or free/paid tools to recover them?" Millions of videos and movies are captured through a mobile phone's camera every day, with such a high number, the security of video data becomes crucial. One of the scariest things that could happen to someone is losing their entire data. However, it is possible to recover deleted or lost video files through Android video recovery software and apps. In this article, we have reviewed different free & paid video recovery software and apps for android in 2022. If you are an iPhone user, you can go to the best iPhone Video Recovery Software. Note: Both desktop software and mobile apps are included in this top list. The main difference between them is: A pc/mac software for Android data recovery can help you restore deleted or lost videos even when the phone is crashed, damaged, and black screen of death, while a data recovery app installed on your Android device works only when the phone/tablet runs normally. So, choose the suitable one according to your video loss scenario. #1: The Best Video Recovery Software - Dr.Fone Data Recovery (Android) First and foremost, Wondershare Dr.Fone is the first-ever brand that delivers personal Android data recovery. With over 8 years of expertise in Android data recovery and over 15 years of experience in data recovery for PC, Wondershare is leading the industry in data technology development. Especially in video recovery, Wondershare has been awarded several patents. Wondershare Dr.Fone is compatible with the majority of Android smartphones and can retrieve the vast majority of file formats thanks to its integration with Android data scanning technology. It has desktop software for Windows PC and an Android app, which you can directly download from the google play store for free to your Android devices. Free Download For Win 7/8/8.1/10/11 Main Features The key features that Dr.Fone Video Recovery for Android are: Recover all file types: With this Android data recovery software, it is possible to recover deleted or lost videos, as well as contact information, images, WhatsApp messages, and more on your Android Smartphone. It doesn't matter how you've lost the video files. Wide Device Range: The Dr.Fone Video Recovery supports 6000+ devices from brands like Samsung, HTC, LG, Sony, Motorola, ZTE, Huawei, etc. The list is still growing rapidly. Recover from an Android's Internal Storage: So many individuals retrieve Android videos from its internal storage. Enable a full check after connecting your Android smartphone to your PC. Deleted files will appear in minutes. Android Video Recovery from Broken Device: Salvaging video files from a broken Android handset is crucial. This video recovery software for Android will not let you down. Connect, scan, and recover are all you need. Android SD Card Data Recovery: Missing SD card files? Android data recovery software is also available. With a card reader and your SD card, you can quickly recover all of your mistakenly deleted videos and other data. Recovering deleted video files on an android phone has been made easy with Dr.Fone Data Recovery. Just simply follow the following steps: Free Download For Win 7/8/8.1/10/11 You can connect your Android phone to the computer with a USB cord. Please make sure that your Android phone has been set up to allow you to connect it to a computer through a USB port. Then open Dr.Fone on your Windows computer, when your device is found, the screen will look like this. Choose "Data Recovery > Recover phone data" from the main menu. After the phone is connected, Dr.Fone for Android will show all the data types it can recover. This means that you can just choose the type of data that you want to get back. Choose "Videos" in this case. Dr.Fone will give you two options: Scan for deleted files or all files. Scan for all files will take a long time, but it will look for files more carefully. Then, click "Next" to move on to the next step in the video recovery process. The program will first look at your device. After that, it will keep looking for deleted videos on your Android phone. The scanning process will take a little while. When the scan is complete, you can preview the found video files one by one. Select all the videos that you want to save, then click "Recover." Free Download For Win 7/8/8.1/10/11 Plans and Pricing A free trial period and a 7-day-money-back guarantee are available for Dr.Fone Android Video Recovery software. The following chart explains the plans and their prices for Dr.Fone Data Recovery Software: Data Recovery for 1-5 Mobile Devices Data Recovery for 1-5 Mobile Devices Unlimited Devices Licensed for 1 PC Licensed for 1+ PC Licensed for 1+ PC \$49.95 \$39.95 \$399.00 Pros & Cons Only supports Windows PC, no Mac version. Recovery is not possible with the trial version Free Download For Win 7/8/8.1/10/11 #2: EaseUS MobiSaver EaseUS MobiSaver for Android is another recommended app to recover lost movies, photos, SMS, contacts, and more. It includes free Android video recovery software for Windows PC and a video recovery app working on Android device. If you want to recover deleted videos directly on your Android Phone, you can download the App from Google Play Store or download the video recovery APK on any of the android app shops like APKMONK by searching "MobiSaver". Main Features The main features offered by EaseUs MobiSaver are given below: It has the capability of recovering photographs and movies from a broad variety of popular file types like messages, contacts, photos and video. EaseUS MobiSaver for Android can recover deleted or lost files from phone's internal memory and SD Card. Backup and restore messages and call logs are both possible with this program. It gives a range of filtering tools to assist you in narrowing down your search results. When you need to use this software, you will need to pay, as it is not free. You can pay using PayPal, Credit Card, Check or Money Order, and some other methods too. A free trial period and a 30-day-money-back guarantee are available. You will find the pricing in the table below: Restore 1 message/contact/picture at a time Single License/ 1 PC Restore 1 video/audio/document at a time Restore unlimited message/contact/picture at a time Recover deleted files directly from Android devices Restore unlimited video/audio/document at a time / Recover deleted files directly from Android devices / Free lifetime upgrade Pros & Cons The Android video recovery software is only available for Windows PC. Unable to recover deleted files from broken Android devices. Unless you purchase an in-app item, there are no customization options available. #3: Tenorshare UltData for Android You may rely on Tenorshare UltData for Android in the event of a data disaster. You can use it to get back any deleted photos and videos you've accidentally or purposefully erased, even ones from WhatsApp. Like the above 2 programs, Tenorshare UltData is also available in versions of Windows/Mac Data Recovery software and the Android video recovery app. The App can be downloaded for free from Google Play or you can download the APK from online App shops. Main Features Restore WhatsApp and recover deleted videos, audio, photos, messages, and other data. This is one of the best video recovery apps for Android. You can scan all local videos on your Android or search by video name. Support for all Android smartphones and tablets, including those from Samsung, LG, Huawei, Motorola, Sony, and Mi, among other manufacturers. With this Android recovery tool, you can easily recover deleted or lost files even without rooting your Phones or Tablets.
